

health-on-line

Directory of Hospitals

A national network of selected hospitals / April 2007

Private medical insurance from Health-on-Line is underwritten by AXA PPP healthcare limited, therefore any reference to 'we, us, our' in this document means AXA PPP healthcare limited.

A national network of selected hospitals

As a Health-on-Line customer, you have access to a national network of hospitals, day-patient units, scanning centres and other private healthcare facilities. These have been selected by our team of doctors, nurses and other medical professionals following a comprehensive assessment of their quality, value and range of services.

All of them are listed in our Directory of Hospitals.

Oral surgery

If you require an oral surgical procedure, then we will provide benefit for those oral surgical procedures as set out in your membership handbook, when your dentist refers you directly to a facility indicated by the **OS** symbol in our Directory of Hospitals. Please visit our website: www.health-on-line.co.uk for further information and contact our team of Personal Advisers before treatment.

Cataract Surgery

If you require an eye operation involving cataract surgery, then we will provide benefit when your General Practitioner refers you directly to one of the facilities indicated by the **CS** symbol in our Directory of Hospitals or where we do not yet have an arrangement in place to a specialist at another Private Hospital. As we increase the number of these arrangements across the country we will provide updated information on our website. Please visit our website: www.health-on-line.co.uk for further information and contact our team of Personal Advisers before treatment.

Our quality assessment and improvement programme

Our initial assessment covers most aspects of the hospital's services. We only select hospitals and other facilities for inclusion in our network if they meet our strict quality criteria. This is only the beginning, however, and once accepted, hospitals must then undertake a programme of continuous quality improvement to ensure that their services continue to meet our required standards, in light of advances in medical care.

In turn, we are committed to supporting the hospitals included in our network, encouraging them to invest in new facilities and services - to our mutual long-term benefit.

We regularly monitor their performance to assess their quality of care, which is why your feedback is particularly important. If you should need to use a facility, please complete your hospital's patient satisfaction survey form and return it to them.

Standards for specialised services

We also work closely with network hospitals that provide certain specialised care services such as cancer, cardiac revascularisation, critical care, paediatrics and psychiatric care. National guidelines for these have been established in conjunction with appropriate professional authorities and organisations.

The benefits of our network hospitals

Being treated in advanced medical facilities in a supportive, professional environment can play an important role in helping patients to recover. The hospitals included in our Directory of Hospitals will endeavour to make your stay as pleasant and comfortable as possible.

You can usually have your own private room with en-suite bathroom, television and telephone. You will be given a choice of dishes for each course at mealtimes and your visitors may, within reason, come and go as they wish.

Be sure to call us first

To check whether you are covered, please call us before you start treatment. We will then be able to authorise your claim in advance - as described in the section 'Receiving treatment and making a claim' in your membership handbook.

There may be rare occasions when we suspend the use of a network hospital or another facility listed in our Directory of Hospitals to protect the interest of our members. Should this occur, we will indicate the suspension on our website: www.health-on-line.co.uk.

Day-patient treatment

Advances in medical care mean that many operations are now undertaken on a day-patient basis. This is in keeping with good clinical practice. Please note that you may be cared for in an open day ward (rather than a single room) while you recover from an anaesthetic to enable nursing staff to monitor your progress more effectively. Most hospitals now offer day-patient treatment and we have included a number of purpose-built day-patient units in the Directory of Hospitals.

Please check the Directory of Hospitals

The map below shows the United Kingdom divided into eleven areas. This is then followed by a list of four different types of medical facility with each shown alphabetically by town and ordered in reference to the eleven areas shown on the map. If you have any questions, please call our team of Claims Personal Advisers.

For full details of the facilities and the range of services provided by the hospitals, scanning centres and other facilities listed in the Directory of Hospitals (and for information on medical specialists we recognise for benefit) please visit the Health-on-Line website: www.health-on-line.co.uk or contact our team of Claims Personal Advisers.

Key to symbols

OS Oral surgery arrangement in place

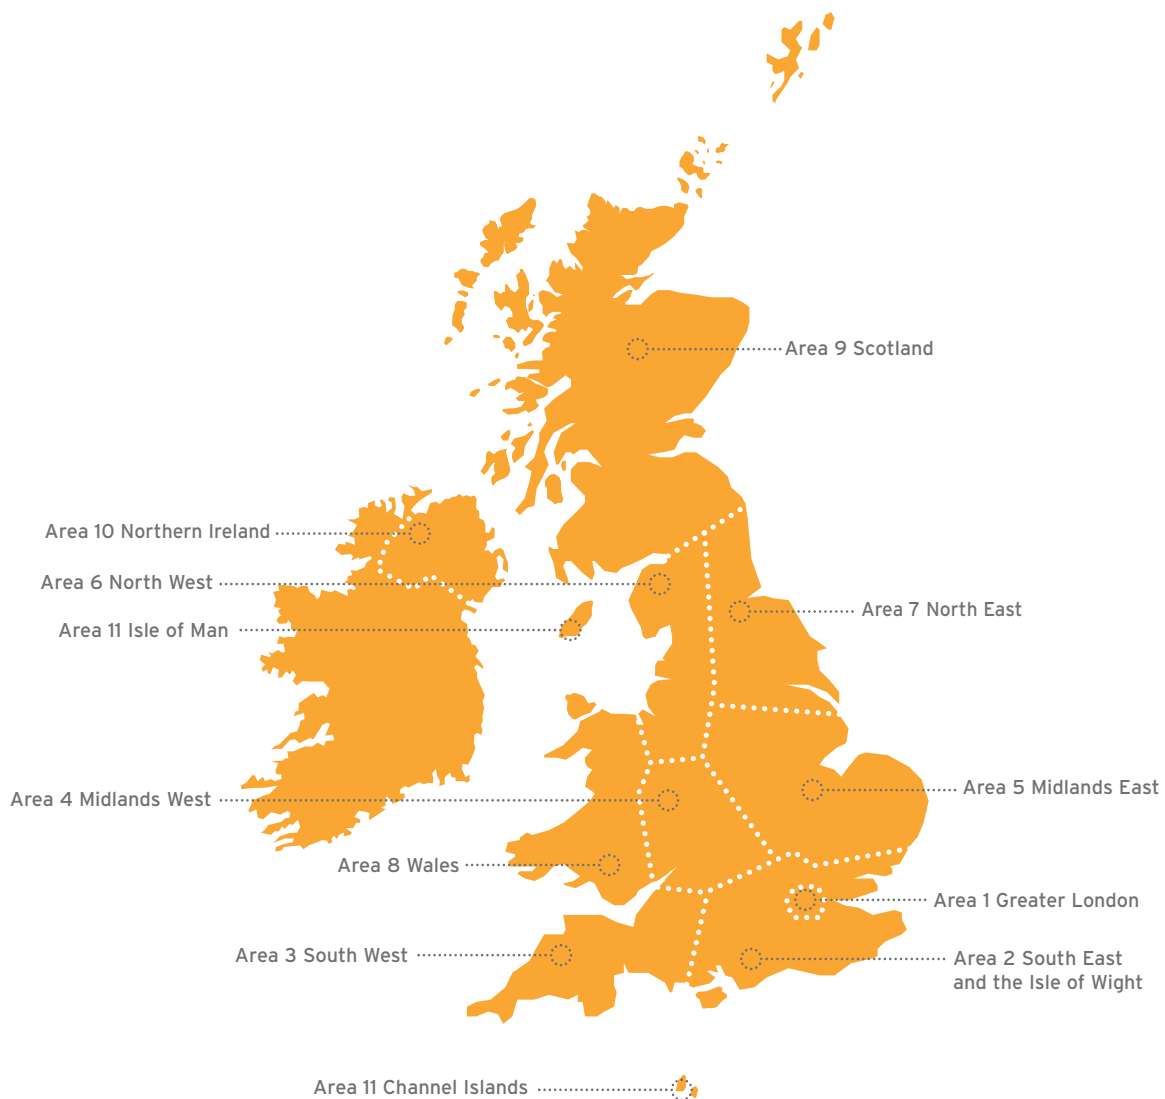

CS Cataract surgery arrangement in place

A triangle (Δ) indicates an NHS hospital that does not have dedicated private patient facilities. (We will recognise an NHS bed nominated as a private bed but in such cases the level of accommodation may be the same as standard NHS accommodation.) The following symbols denote which scans are available at the scanning centres listed in section two:

M MRI (magnetic resonance imaging)

C CT (computerised tomography)

P PET (positron emission tomography)

Section one

General hospitals

(by area)

General hospitals - acute medical and surgical hospitals and day-patient units which are recommended by AXA PPP healthcare following our selection process and where you will receive a full refund for hospital treatment. Please see the notes on the front cover relating to the symbols.

Hospital List

AREA 1

GREATER LONDON HOSPITAL

- E1 BMI London Independent Hospital
- EC1 Moorfields Eye Hospital
- N12 London Day Surgery Centre (Day-patient unit)
- NW1 Harley Street on T15 at UCLH
- NW3 Royal Free Hospital
- NW4 BMI The Garden Hospital
- NW8 Hospital of St John and St Elizabeth
- NW8 Wellington Hospital
(Members may have to share a room due to limited supply of single rooms)
- SE1 London Bridge Hospital

Scanning Centres - MRI/CT/PET

(by area)

Scanning centres MRI/CT/PET - these centres provide high technology magnetic resonance imaging (MRI-indicated by **M** in the entry), computerised tomography (CT-indicated by **C** in the entry) and positron emission tomography (PET-indicated by **P** in the entry) diagnostic scanning services. These are usually carried out on an out-patient basis.

Only the centres listed in this section can be used for out-patient MRI/CT/PET scanning. Some of these centres may also be in our list for other forms of treatment.
